Introduction

In 1984, the New Brunswick Genealogical Society was awarded a Bicentennial project grant to transcribe early census records for several counties. One of the counties for which the 1861 returns were partially transcribed was Queens County. Since 1984, the returns for the remaining parishes have been transcribed, and all the entries have been edited. This publication is the result of the cooperative efforts of the New Brunswick Genealogical Society and the Provincial Archives of New Brunswick.

Most of the 1851 census returns for Queens County have not survived, with the exception of a large portion of the Parish of Wickham, which has been included in this volume. The 1851 returns for this parish were recorded in the form of a scroll and, therefore, there are no page numbers. Researchers should also note that the 1861 returns for the Parish of Gagetown are missing, and only sections 1 and 3 of the Parish of Petersville are extant.

In preparing this transcription, every effort has been made to faithfully reproduce the information as it was recorded by the census taker. There has been no conscious attempt to interpret what perhaps might or should have been written and, in so far as possible, the transcription is true to the original document. For this reason, the idiosyncrasies of the census taker are discernible (e.g., in Chipman Parish, Charlotte is always spelled Sharlott, and Matthew is spelled Mathew). Irregularities such as these have been preserved.

In this transcription, the original order of the records has been maintained and a master index (including name, parish and household numbers) has been created. The column "HH" (Household Number) has been created to facilitate use of the index.

Where there has been some uncertainty about a name (whether Christian or surname), square brackets have been placed after it (i.e. Jonesse []). The normal practice of placing the name within brackets could not be used because this interferes with computer alphabetization. However, in columns where alphabetizing was not a factor, question marks are used to denote suppositions or uncertainties.

Many abbreviations are used in this transcription and a guide to these follows.

Introduction

En 1984, la Société généalogique du Nouveau-Brunswick s'est vu octroyer, pour l'été un projet du bicentenaire ayant pour objet la transcription des résultats de recensement anciens de certains comtés. La Société s'est ainsi occupée, entre autres, du comté de Queens, dont une partie seulement des résultats de recensement de 1861 avaient été transcrits. Par après on a procédé à la transcription des résultats de recensement des paroisses restantes, puis révisé l'ensemble des résultats. Nous devons la création de ce volume aux efforts conjoints de la Société généalogique du Nouveau-Brunswick et des Archives provinciales du Nouveau-Brunswick, qui, pendant toutes ces années, ont consacré leur temps à cette ouvre.

Les résultats de recensement du comté de Queens sont uniques car, alors que la plupart des résultats de 1851 n'ont pas été conservés, une grande partie des résultats de la paroisse de Wickham datant de 1851 existent encore, résultats que nous avons transcrits et insérés dans le présent volume. Il est à noter, en ce qui touche cette paroisse, que les résultats de recensement apparaissent sous forme de rouleaux; les pages ne sont donc pas numérotées. L'utilisateur notera également qu'il manque les résultats de la paroisse de Gagetown, et que seules existent les sections 1 et 3 pour la paroisse de Petersville.

Les utilisateurs du volume doivent savoir que nous avons essayé de respecter, dans la préparation de la transcription, le travail de l'agent recenseur. Nous avons volontairement évité d'interpréter ce que nous pensons qu'aurait du inscrire l'agent et avons, au contraire, tout fait pour rester fidèle au document (c'est-a-dire, aux résultats du recensement) en présentant les écrits de l'agent. Vous pourrez ainsi remarquer certaines particularités d'écriture de l'agent recenseur (par ex., dans la paroisse de Chipman, Charlotte était écrit Sharlott et Matthew était écrit Mathew, et nous avons respecté cette orthographe).

Dans la transcription du recensement qui suit, nous avons conservé l'ordre original et créé un index général pour tout le comté (comprenant le nom, la paroisse et les numéros de ménages). Les chercheurs noteront que nous avons créé la colonne "HH" ou "numéro de ménage" pour faciliter l'utilisation de l'index.

Lorsque nous n'étions pas certains d'un nom, qu'il s'agisse du nom de famille ou de baptême, nous avons fait suivre ce nom de crochets (par ex. Jonesse []). Nous n'avons pas utilisé la pratique courante de mettre le nom entre crochets afin de ne pas interférer avec le mode informatique de mise en ordre alphabétique. Néanmoins, dans les colonnes où cet ordre n'intervient pas, nous avons eu recours au point d'interrogation pour indiquer une supposition ou une incertitude.

De nombreuses abréviations apparaissant dans la présente transcription, nous avons jointe guide ci-dessous.
